SUMMARY

Front-End Developer and Web3 Learner passionate about building interactive and scalable applications. Skilled in React, Next.js, and Tailwind CSS, with hands-on blockchain experience using Solidity and EduChain. Strong focus on solving real-world problems with clean UI, responsive design, and decentralized integrations.

PROJECTS

EasyTickets (In Progress)   Blockchain-based ticketing solution
A decentralized event ticketing platform for secure ticket creation, sales, and verification using smart contracts.

Aclips Crypto Wallet Address Book   Wallet Management dApp
Built a vault app to save, search, and delete wallet addresses securely.

Event Scheduler Bot   Telegram Integration
Bot to create, manage, and track events with blockchain-inspired features.

Rock, Paper, Scissors   Game
Interactive browser-based game with animations and logic.

iPhone Calculator Clone   JavaScript
Full-functionality replica of the iOS calculator.

Color Guess Game   Web Game
Game to guess RGB values based on displayed colors.

Portfolio Website   Web Portfolio
Personal website showcasing projects and contact info.

EDUCATION

B.Sc. Computer Science   Ongoing
Taraba State University, Jalingo, Nigeria

CERTIFICATIONS

HackQuest – Ethereum Learner
HackQuest – Edu Learner

SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, Solidity
Frameworks: React.js, Tailwind CSS, Next.js
Tools: Git, VS Code, Chrome DevTools
Other: Prompt Engineering, Smart Contracts
Soft Skills: Communication, Collaboration, Problem Solving

INTERESTS

Problem Solving, UI/UX Design, Web Development, Blockchain
